Experiment 10

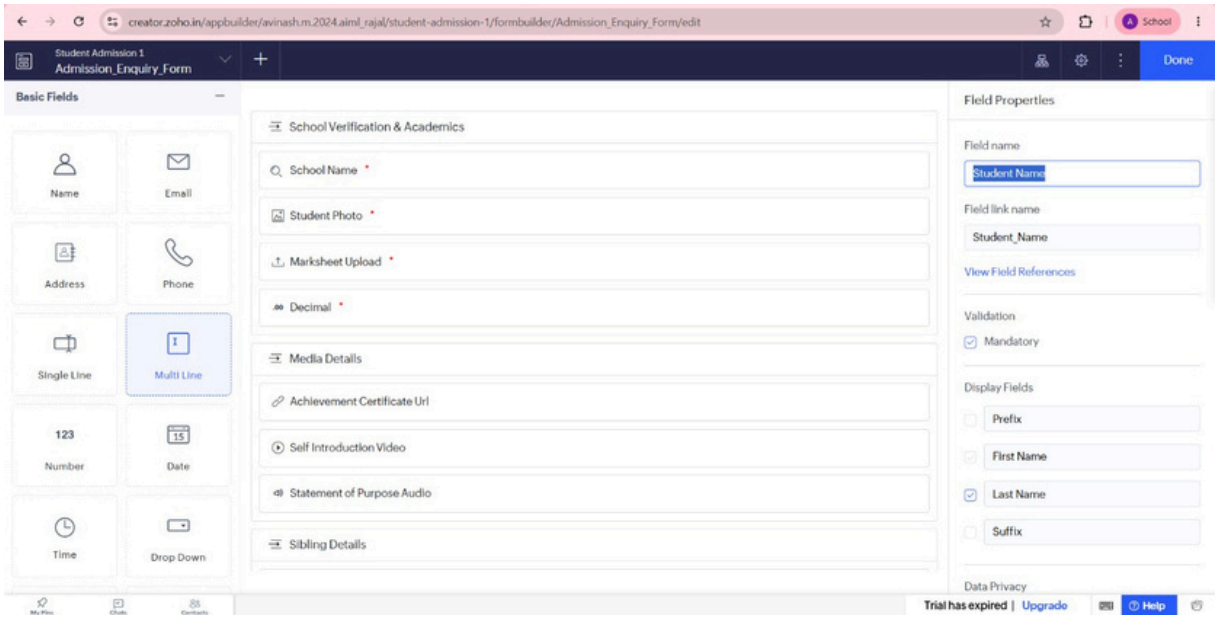

Aim:

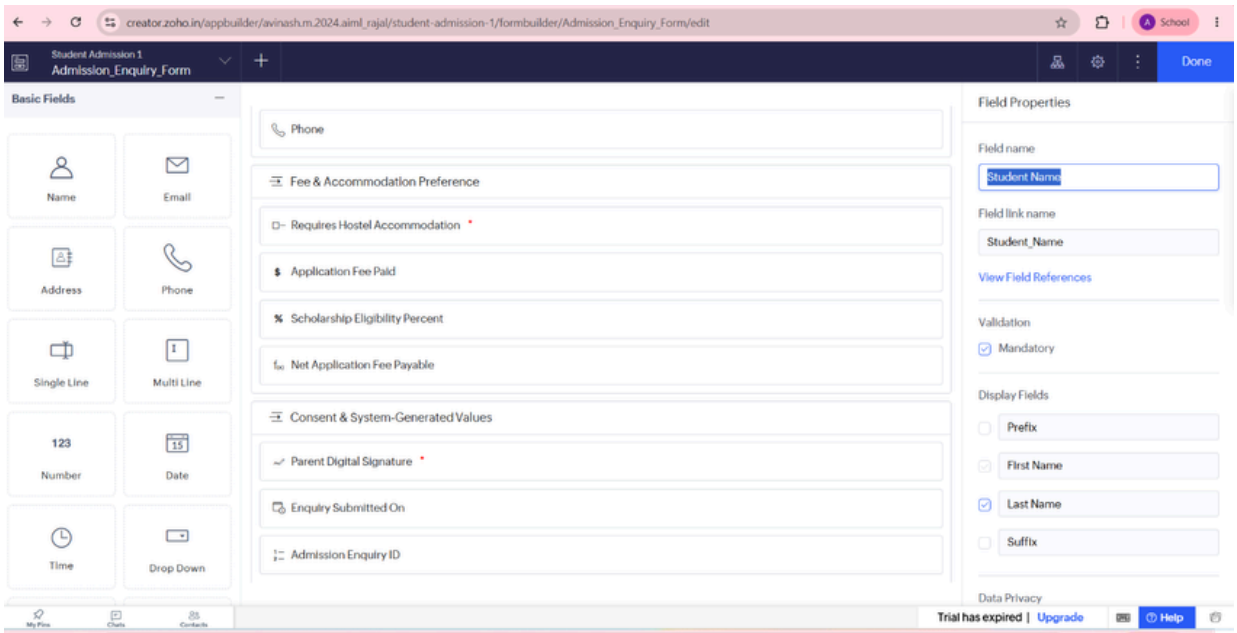

To optimize the performance of the Zoho Creator Student Admission application by improving form loading speed, reducing unnecessary database operations, optimizing Deluge scripts, and ensuring efficient report generation.

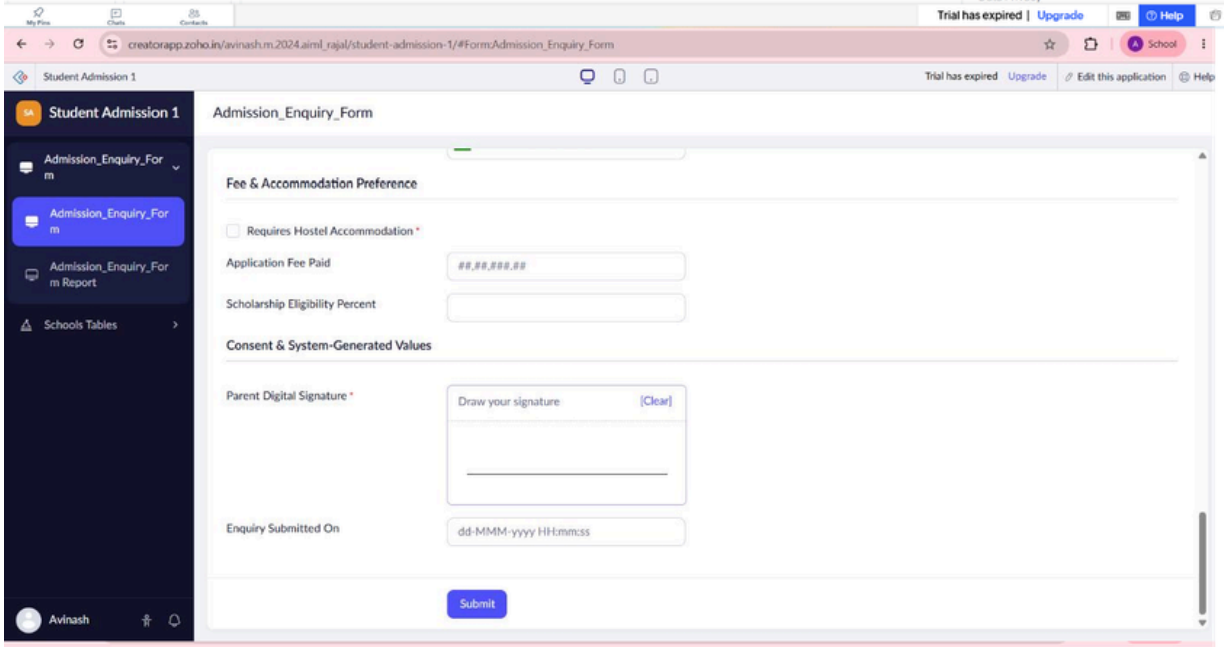

Procedure:

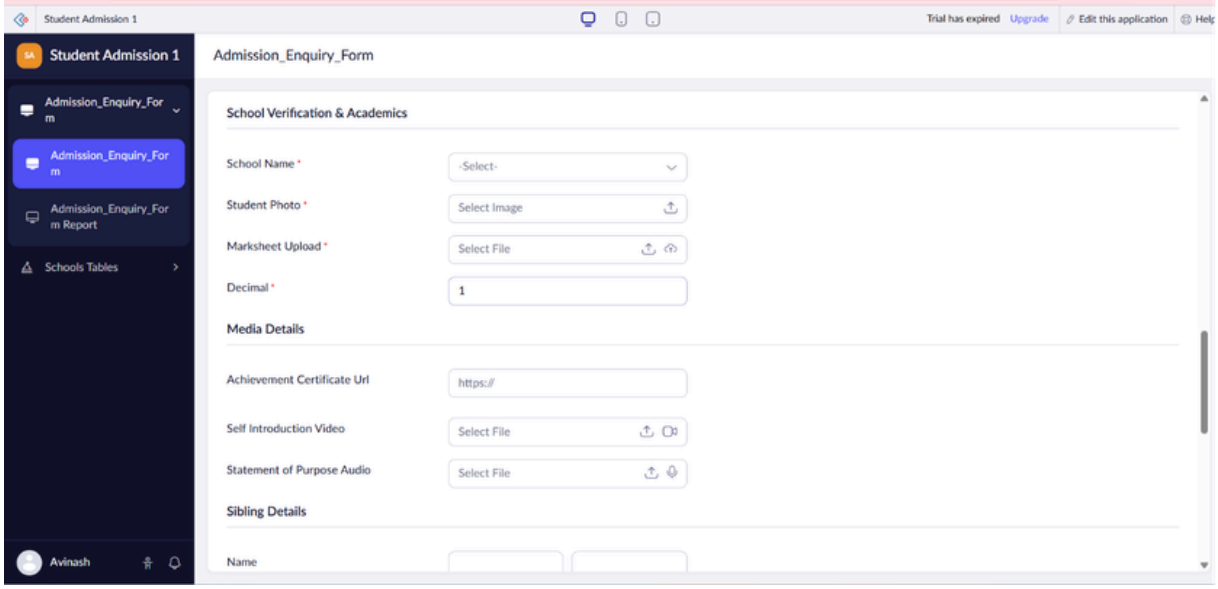

1. Log in to Zoho Creator and open the LC-09 – Student Admission application.
2. Review the student admission forms and remove unnecessary fields, scripts, and workflows.
3. Optimize Deluge scripts by avoiding repeated database queries and unnecessary loops.
4. Use criteria-based record fetching to retrieve only the required student records.
5. Optimize reports by displaying only essential columns and applying suitable filters.
6. Reduce unnecessary workflow executions and avoid duplicate email notifications.
7. Test the application after making changes to compare loading speed and responsiveness.
8. Verify that all admission features work correctly after optimization.
