Experiment 5

Aim:

To design and build a complete suite of Reports in Zoho Creator for the existing "Student Admission Enquiry Form" application, demonstrating the correct usage of all nine Report Types available in Zoho Creator

Report Used:

Report Type	Report Name
List View	All_Enquiries_List
Spreadsheet View	Enquiries_Spreadsheet
Kanban View	Enquiry_Status_Kanban
Calendar View	Counselling_Schedule_Calendar
Map View	Scholarship_Eligibility_Percent
Timeline View	Enquiry_Activity_Timeline
Pivot Table	Course_By_Gender_Pivot
Chart View	Course_Popularity_Chart

All_Enquiries_List (List View)

- Default landing report for the Admission Cell, showing every enquiry in a flat, searchable list.
- Includes a search bar and column-level filters for Preferred Course, Gender, and Enquiry Status.

Enquiries_Spreadsheet (Spreadsheet View)

- Used daily by the Admission Cell to update document verification and counselling status in bulk.
- Only Document Verification Status, Counselling Status, and Admission Status columns are editable; all other columns are read-only.

Enquiry_Status_Kanban (Kanban View)

- Used by the Admission Cell to visually track how applicants move from Enquiry Received to Admitted or Rejected.
- Staff drag an applicant's card across columns as their status changes, updating the underlying Status field automatically.

Counselling_Schedule_Calendar (Calendar View)

- Used by department coordinators to see how many applicants are scheduled for counselling on a given day.
- Clicking a date drills down into the list of applicants scheduled for counselling that day.

Applicant_School_Map (Map View)

- Used by the outreach team to identify which schools and regions are generating the most enquiries.
- Helps plan school promotional visits and career-guidance sessions in underrepresented areas.

Enquiry_Activity_Timeline (Timeline View)

- Used by management to monitor enquiry inflow trends across the admission season.
- Helps decide when to intensify outreach campaigns if enquiries are trending below target.

Course_By_Gender_Pivot (Pivot Table)

- Used by management to understand the gender diversity of applicants across courses.

 Supports targeted outreach to improve diversity in courses with skewed applicant demographics.

Course_Popularity_Chart (Chart View)

 Used in admission committee meetings to visually compare demand across different courses.

 Directly informs decisions on seat allocation and whether to open additional sections for high-demand courses.

Course_Wise_Summary (Summary View)

 Used by management to gauge the academic profile strength of applicants per course.

 Summary totals feed directly into cut-off setting and merit-list preparation.

6. Validation & Configuration Rules

 List View (All_Enquiries_List): default sort by Enquiry Submitted On, descending, so the most recent enquiries appear first.

 Spreadsheet View (Enquiries_Spreadsheet): edit permissions restricted to the Admission Cell role; all other fields locked.

 Kanban View (Enquiry_Status_Kanban): card movement between columns triggers an automatic update to the Status field with a timestamp.

 Calendar View (Counselling_Schedule_Calendar): only the current and next week's counselling sessions are shown, to keep the view actionable.

 Map View (Applicant_School_Map): requires the Residential Address field to be geocode- enabled for accurate pin placement.

Timeline View (Enquiry_Activity_Timeline): data refreshes daily to reflect the latest enquiry trend.

 Pivot Table (Course_By_Gender_Pivot): blank cells are displayed as zero rather than being left empty, to avoid ambiguity.

 Chart View (Course_Popularity_Chart): chart is set to auto-refresh whenever a new enquiry is submitted.

 Summary View (Course_Wise_Summary): courses with zero enquiries are still listed

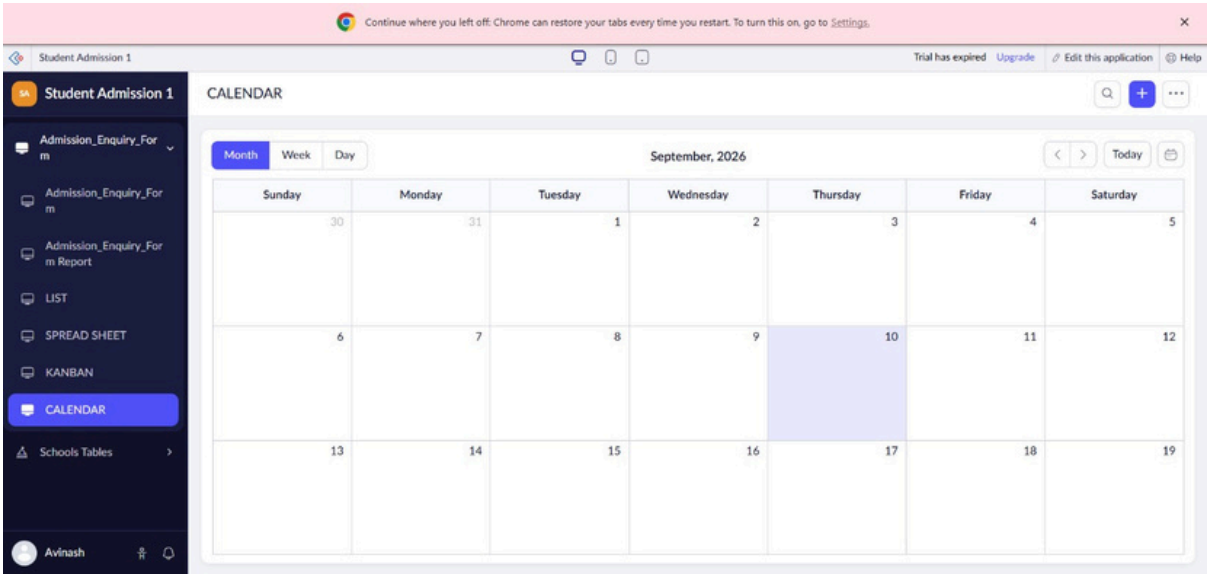

with a zero count, to flag courses needing more promotion.

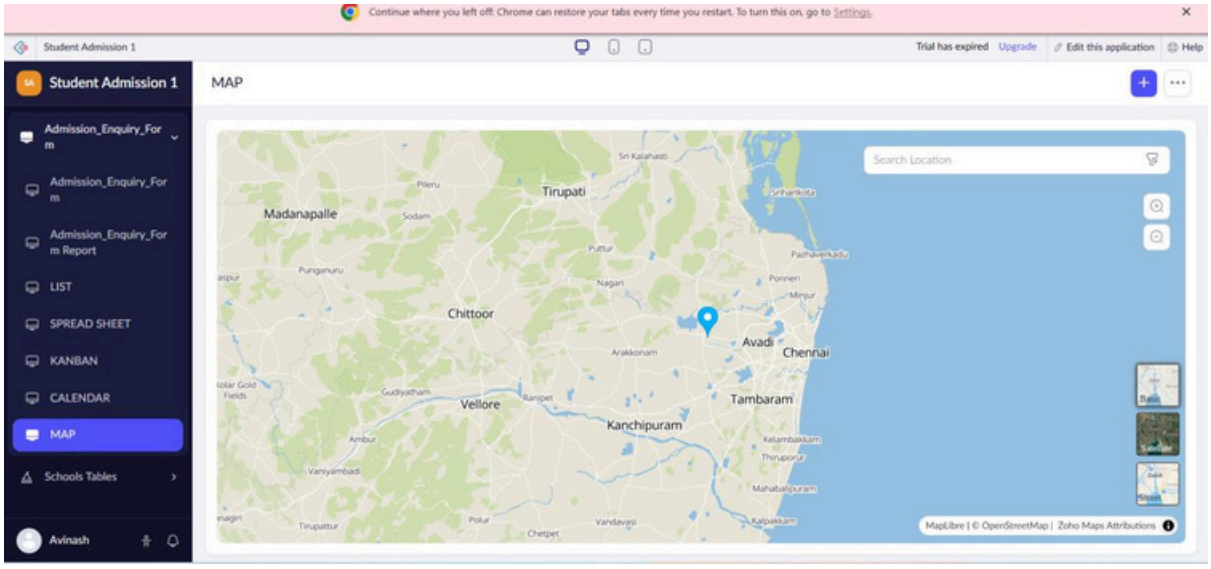

7. Workflow Summary

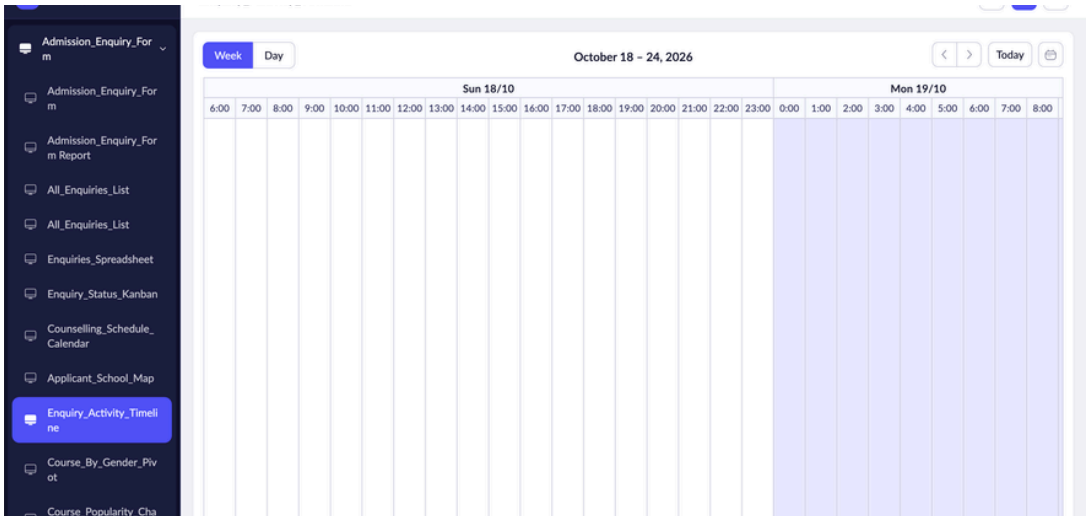

- Step 1: Applicants submit admission enquiries through the Admission_Enquiry_Form as covered in the base use case.
- Step 2: The Admission Cell monitors incoming enquiries using the All_Enquiries_List and the Enquiry_Activity_Timeline.
- Step 3: As document verification proceeds, staff track progress visually using the Enquiry_Status_Kanban.
- Step 4: Department coordinators use the Counselling_Schedule_Calendar to prepare for each day's scheduled counselling sessions.
- Step 5: The outreach team uses the Applicant_School_Map and Course_Wise_Summary to plan school visits and academic-profile-based counselling.
- Step 6: College management reviews the Course_By_Gender_Pivot and Course_Popularity_Chart in planning meetings to adjust seat allocation and outreach focus.
- Step 7: On a daily basis, the Admission Cell uses the Enquiries_Spreadsheet to update verification and counselling status in bulk.
