Experiment 6

Aim:

To design and build a complete automation layer in Zoho Creator for the existing "Student Admission Enquiry" application, demonstrating the correct usage of all eight Workflow options in Zoho Creator — Form Workflows, Schedules, Approvals, Payments, Blueprints,Batch Workflows, Report Workflows, and Functions

On_Enquiry_Submit_Workflow (Form Workflow)

 Fires the moment a new record is added to Admission_Enquiry_Form.

 Sends an acknowledgement email to the applicant containing their Admission Enquiry ID and expected next steps, and notifies the Admission Cell for triage.

Daily_Counselling_Reminder_Schedule (Schedule)

 Runs automatically every evening without any manual trigger, querying all records where a counselling session is scheduled for the following day.

 Includes the venue, reporting time, and a checklist of original documents to bring for verification.

Scholarship_Waiver_Approval (Approval)

 Only applicants eligible for a scholarship above the configured threshold require this approval step; standard-fee applicants bypass it entirely.

 The fee waiver is not applied to the applicant's Net_Application_Fee_Payable until the Dean/Admission Head approves the request from their approval inbox.

Application_Fee_Payment_Workflow (Payments)

 Integrates with a payment gateway connector configured in Zoho Creator to generate a secure payment link based on the Net_Application_Fee_Payable formula field.

 On successful payment, the workflow automatically updates Fee_Paid_Status to 'Paid' and stores the transaction reference; on failure, it flags the record for Admission Cell follow-up.

Admission_Lifecycle_Blueprint (Blueprint)

 Each stage transition (e.g., Document Verification to Counselling Scheduled) is restricted to specific roles, so a front-desk assistant cannot mark an applicant Admitted without the intermediate stages being completed.

 The Blueprint view gives the Admission Cell head a visual, auditable trail of exactly when and by whom each applicant moved between stages.

Bulk_Admission_Confirmation_Batch (Batch Workflow)

 Used at the close of each counselling round to notify the entire newly admitted batch at once with their confirmation letter and joining instructions.

 Processes records in batches rather than all at once, preventing the workflow engine from timing out when a large cohort is admitted simultaneously.

OnEdit_Recalculate_NetFee_Workflow (Report Workflow)

 Ensures that if the Admission Cell manually adjusts the scholarship percentage directly within the report grid, the Net_Application_Fee_Payable stays accurate without requiring a full form resubmission.

 Prevents inconsistent fee records that could arise from manual overrides.

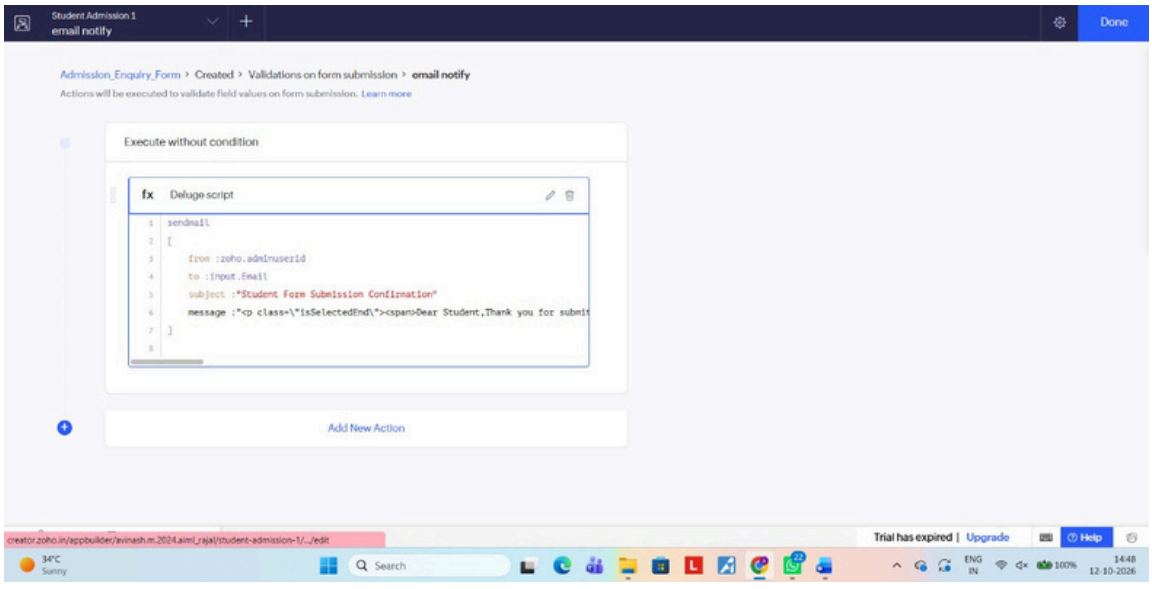

Generate_AdmissionLetter_Function (Function)

 Written once as a reusable Deluge function, it can be called from multiple places: automatically when an applicant's status changes to Admitted, manually via a 'Resend Admission Letter' button, or from the Bulk_Admission_Confirmation_Batch for the entire admitted cohort.

 Centralizing this logic in a function avoids duplicating admission-letter generation code across multiple workflows

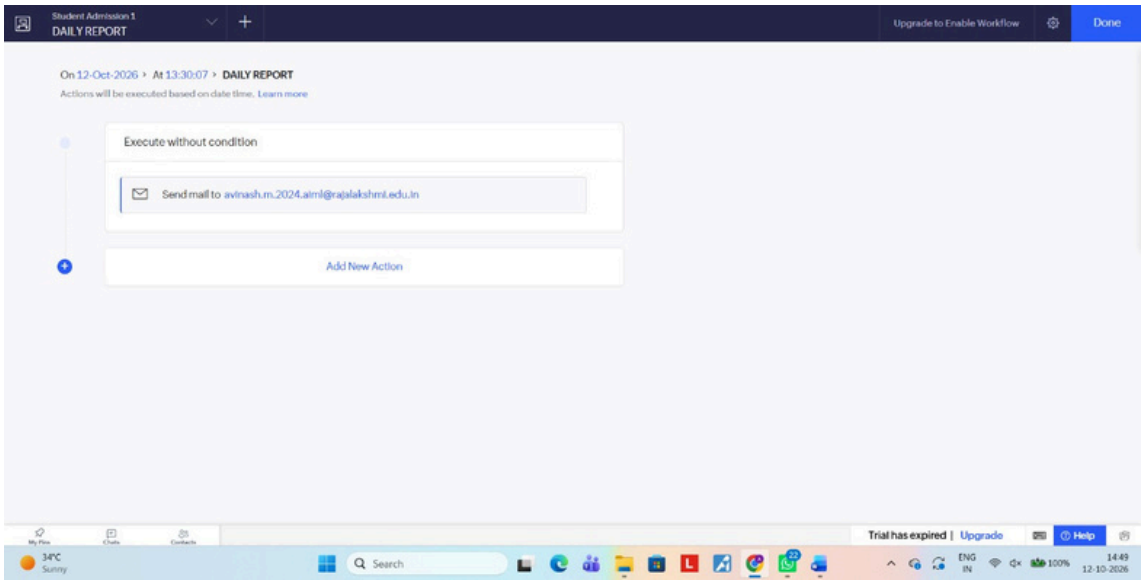

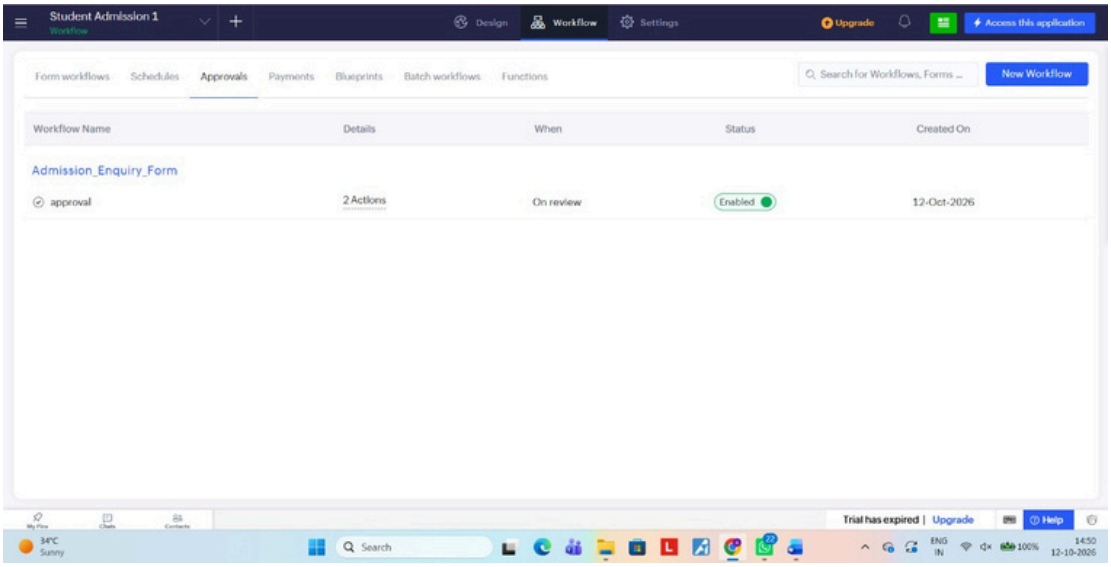

.

7:50 AM (4 minutes ago)
Dear Student,Thank you for submitting the student form.
Your submission has been received successfully. Our team will review the submitted information, and you will be notified soon regarding the next steps.
Thank you for your submission.
Regards,
Student Administration Team
